

BLACK EAGLE

BLACK EAGLE

DOMINATE THE SKY

No matter where you are, even in the most extreme environment,
with your Benelli firearm you live the action to the fullest.

Uncompromisingly, endlessly.

 **Benelli**

BLACK EAGLE

A challenge within the challenge

The barrel extension, detached from the barrel, is made of aluminium and makes the Black Eagle light and versatile in every available gauge.

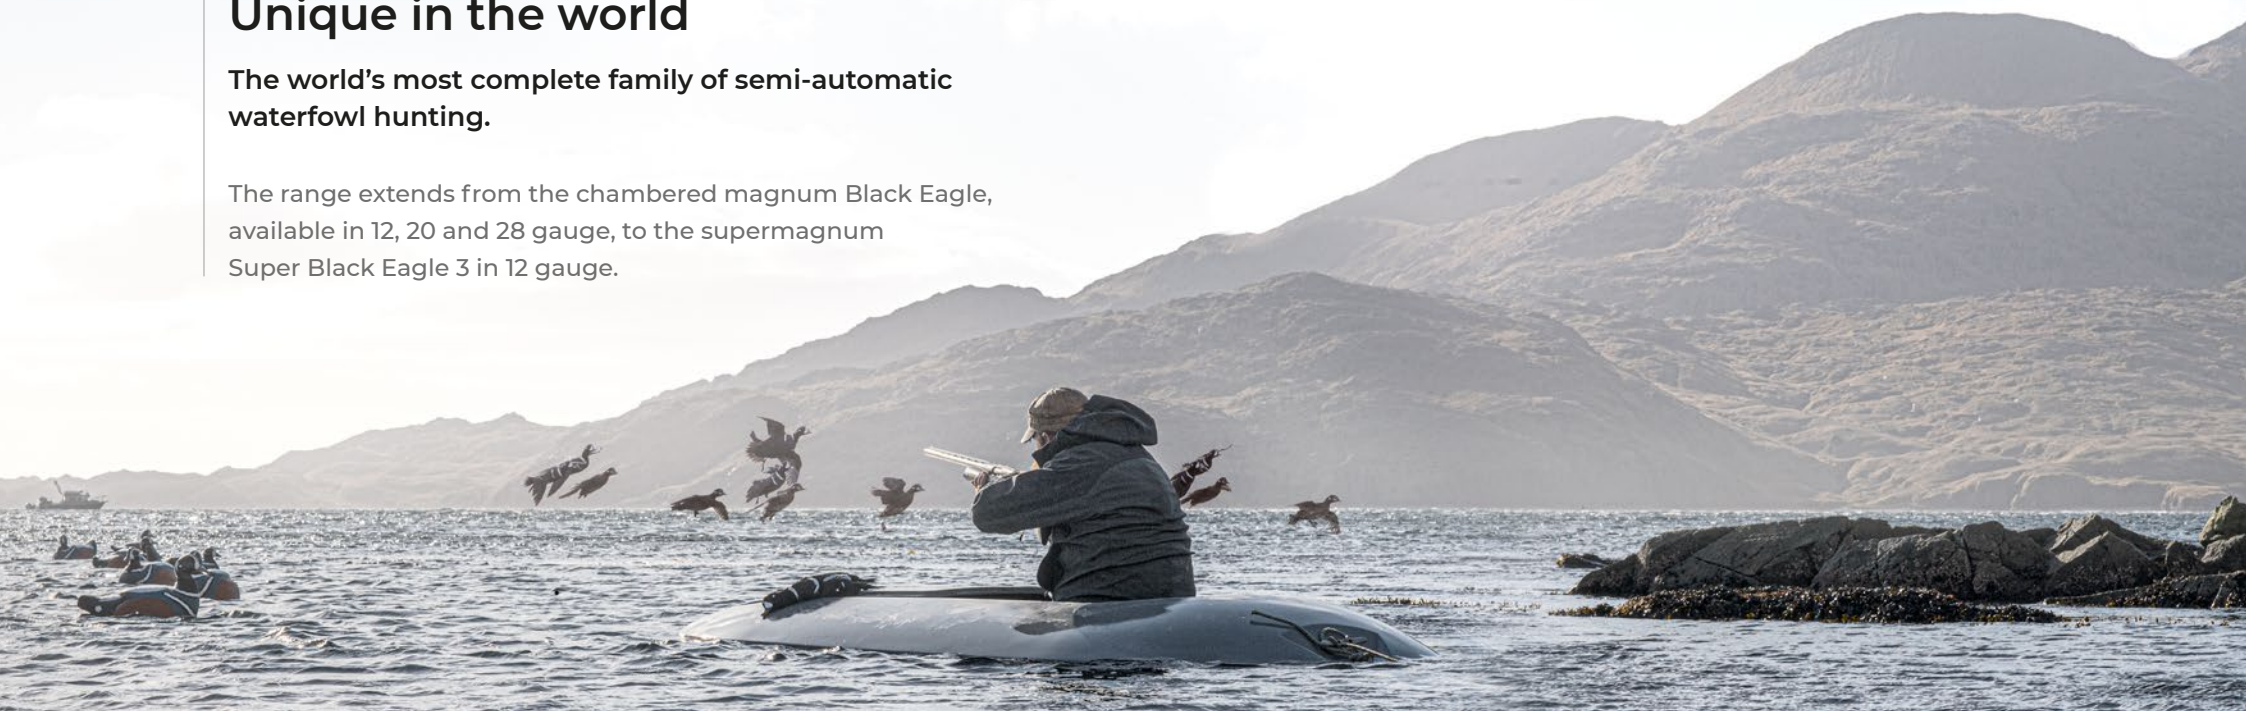

The smallest 28 gauge is characterized by an extremely solid structure, combined with an unrivalled lightness and handling, which will bring the hunting challenge to the highest level.

Unique in the world

The world's most complete family of semi-automatic waterfowl hunting.

The range extends from the chambered magnum Black Eagle, available in 12, 20 and 28 gauge, to the supermagnum Super Black Eagle 3 in 12 gauge.

BLACK EAGLE

1 ComforTech 3

The system reduces the felt recoil and the consequent muzzle of the barrel, guaranteeing the hunter total control of the firearm and the maximum speed of aiming, even in repeated shots.

2 Combtech

The ergonomic comb significantly dampens the impact on the cheek, absorbs vibrations and ensures maximum comfort for the hunter.

3 Trigger guard

The guard is designed to quickly reach the trigger and easily activate the safety and cut off.

4 Inertia Driven System

Benelli inertial system is synonymous with design rigor, construction simplicity and mechanical precision, ensuring minimum maintenance, absolute resistance and extreme reliability.

5 Easy Loading

The system guarantees maximum fluidity, functionality and quick insertion and removal of the cartridges from the magazine.

6 Easy Locking

The exclusive locking system of the bolt is anti-bounce, limits the accidental retraction of the mechanism and it is easily returned to locking, for a reliable shotgun, safe and always ready to shoot.

7 AirTouch and ergonomic fore-end

The checkering helps the grip and natural aeration of the hand. In combination with the ergonomic fore-end, it ensures a firm and secure grip.

8 Magazine tube

The barrel can fit a longer magazine tube, which increases the loading capacity to 5+1 rounds, where allowed, for absolute versatility.

9 Fore-end cap

The ergonomic design ensures extreme functionality in tightening and disassembly. The special anti-lock closing mechanism makes the cap easily removable at all times.

10 Crio barrel and chokes

Barrel and chokes are subjected to cryogenic treatment and guarantee excellent ballistic performance and wider and denser pattern.

SUPER BLACK EAGLE 3

1 ComforTech 3

— The system reduces the felt recoil and the consequent muzzle of the barrel, guaranteeing the hunter total control of the firearm and the maximum speed of aiming, even in repeated shots.

2 Combtech

— The ergonomic comb significantly dampens the impact on the cheek, absorbs vibrations and ensures maximum comfort for the hunter.

3 Trigger Guard

— The guard is designed to quickly reach the trigger and easily activate the safety and cut off.

4 Inertia Driven System

— Benelli inertial system is synonymous with design rigor, construction simplicity and mechanical precision, ensuring minimum maintenance, absolute resistance and extreme reliability.

5 Easy Loading

— The system guarantees maximum fluidity, functionality and quick insertion and removal of the cartridges from the magazine.

6 Easy Locking

— The exclusive locking system of the bolt is anti-bounce, limits the accidental retraction of the mechanism and it is easily returned to locking, for a reliable shotgun, safe and always ready to shoot.

7 AirTouch and ergonomic fore-end

The checkering helps the grip and natural aeration of the hand. In combination with the ergonomic fore-end, it ensures a firm and secure grip.

8 Magazine tube

The barrel can fit a longer magazine tube, which increases the loading capacity, where allowed, for absolute versatility.

9 Fore-end cap

The ergonomic design ensures extreme functionality in tightening and disassembly. The special anti-lock closing mechanism makes the cap easily removable at all times.

10 BE.S.T.

For the BE.S.T. models, it guarantees incomparable resistance to corrosion and wear and makes the treated surfaces completely anti-glare thanks to the matt colour in absolute black.

11 Crio barrel and chokes

Barrel and chokes are subjected to cryogenic treatment and guarantee excellent ballistic performance and wider and denser pattern. The barrel is a whole with the steel upper receiver, increasing the rigidity of the assembly and improving the precision.
